

William Floyd School District School Safety Perimeter Plan

UPDATE 12/17/13

As a follow up to the District's previous communication regarding the school safety perimeter plan, we are in the process of implementing the next phase of construction. Starting this week and continuing during the upcoming break, construction of new interior walls will occur inside the main entrances of each school. This will not impact the school day or after school activities. Additionally, the security booths have been ordered and are expected to arrive in February. We will keep you informed as the security plans progress.

Original Message 11/21/13

To ensure the safety of students and staff, the William Floyd School District is in the process of implementing a comprehensive school safety perimeter plan. The first phase includes the installation of additional fencing and gates throughout the district; the second phase includes the installation of security booths near each building's front entrance, which is not expected to impact normal arrival and dismissal times. This project will be implemented over the course of this school year. Additional updates and information for each building will be forthcoming
