

Google Chrome

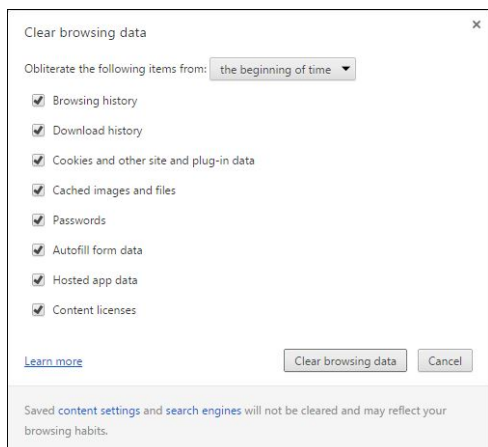

<click> on the 3 horizontal bars at the right and the popup panel below on the right will open.

<click> on fifth option from the bottom is **Settings**. <click it>

<click> on History, then <click> Clear browsing data.
The following panel will popup.

Choose **"from the beginning of time"** and **check all boxes**.

<click> Clear browsing data.

Please be advised, the Google Chrome browser may not automatically clear your cache and cookies every time you exit the application. So users will need to do this manually if they ever experience a display issue.
